

Enter a new world of logistics

Homerunner helps Asian companies unlock their full potential in Europe's most rewarding markets.

A man with short, light-colored hair and a slight smile, wearing a light-colored striped button-down shirt and a watch on his left wrist. He has his arms crossed and is standing in front of a window with sheer curtains.

Ready to expand your business?

At Homerunner, we believe borders should never hold back ambition. Europe is packed with opportunities, but all too often, complexity holds businesses back. Languages, currencies, regulations, and fragmented transport turn growth into a struggle.

We're here to change that. Homerunner was founded on a simple vision: to make logistics effortless, so companies can expand without fear, and focus on what truly matters, generating value, building relationships, and shaping the future.

Over 8,000 companies already trust us to deliver their dreams across Europe. Because we don't just move shipments – we help move dreams, ideas, and businesses forward.

Your next chapter has no borders.
Let's begin the journey together.

Per Imer
CEO, Homerunner

Growth should feel like freedom, not chaos.

But the moment you expand, the challenges build: dozens of carriers, endless contracts, 27 currencies, countless VAT rules, and languages you don't speak. What starts as opportunity quickly turns into overwhelm.

That's where Homerunner comes in. We take the hidden weight of shipping, logistics, and sourcing off your shoulders. One platform, three simple connections, Carrier, Product, Service. Suddenly, the noise fades. Complexity disappears.

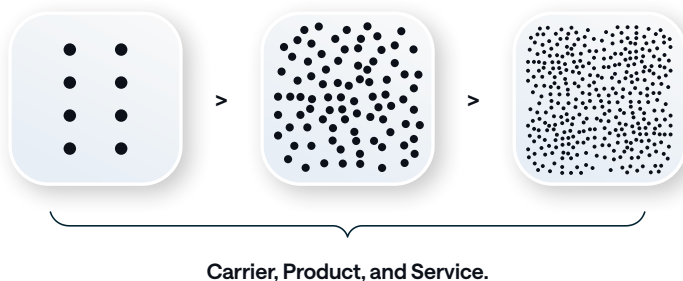

No entry fees. No subscriptions. No hidden costs. You pay as you ship.

With Homerunner, scaling isn't about surviving the maze. It's about focusing on what really matters: new markets, stronger trust, and the joy of building a business without borders.

Going from chaotically complex to super simple

Complexity multiplies fast, **eight systems** already create **hundreds** of hidden variables. Expand further, and suddenly you're managing **tens of thousands**. That's not growth, that's chaos. Homerunner reduces all of it to just three connections: Carrier, Product, and Service.

Carrier, Product & Service

Three words that make all the difference

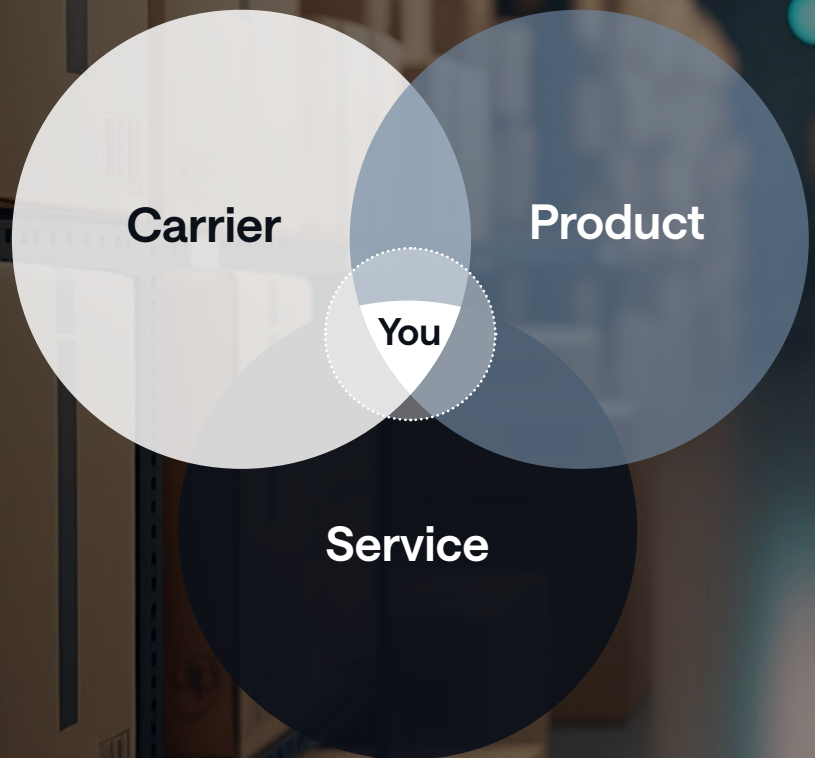

At Homerunner, our entire approach rests on three pillars: Product, Carrier, and Service. Together, they form a simple framework that moves anything, anywhere.

Product defines what you ship; containers, pallets, or specialised units.

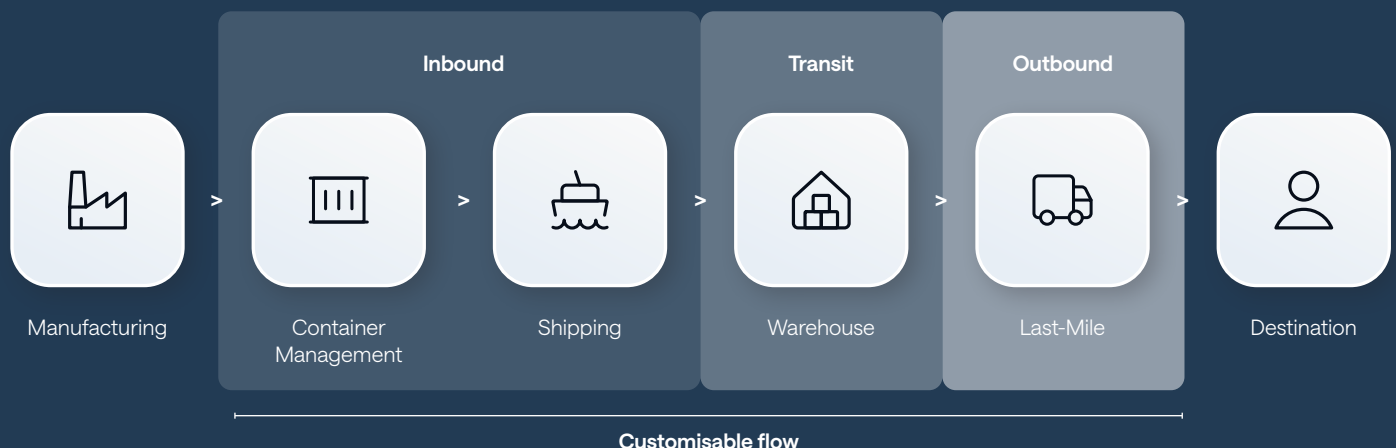

Carrier ensures how it travels; by sea, air, rail, or road.

Service tailors the solution; whether it's global container transport, road freight, or last-mile delivery.

By structuring logistics through these three dimensions, we cut through the complexity, enabling faster decisions, seamless scaling across borders, and deliveries you can rely on. With Homerunner, international logistics becomes straightforward.

The journey of goods

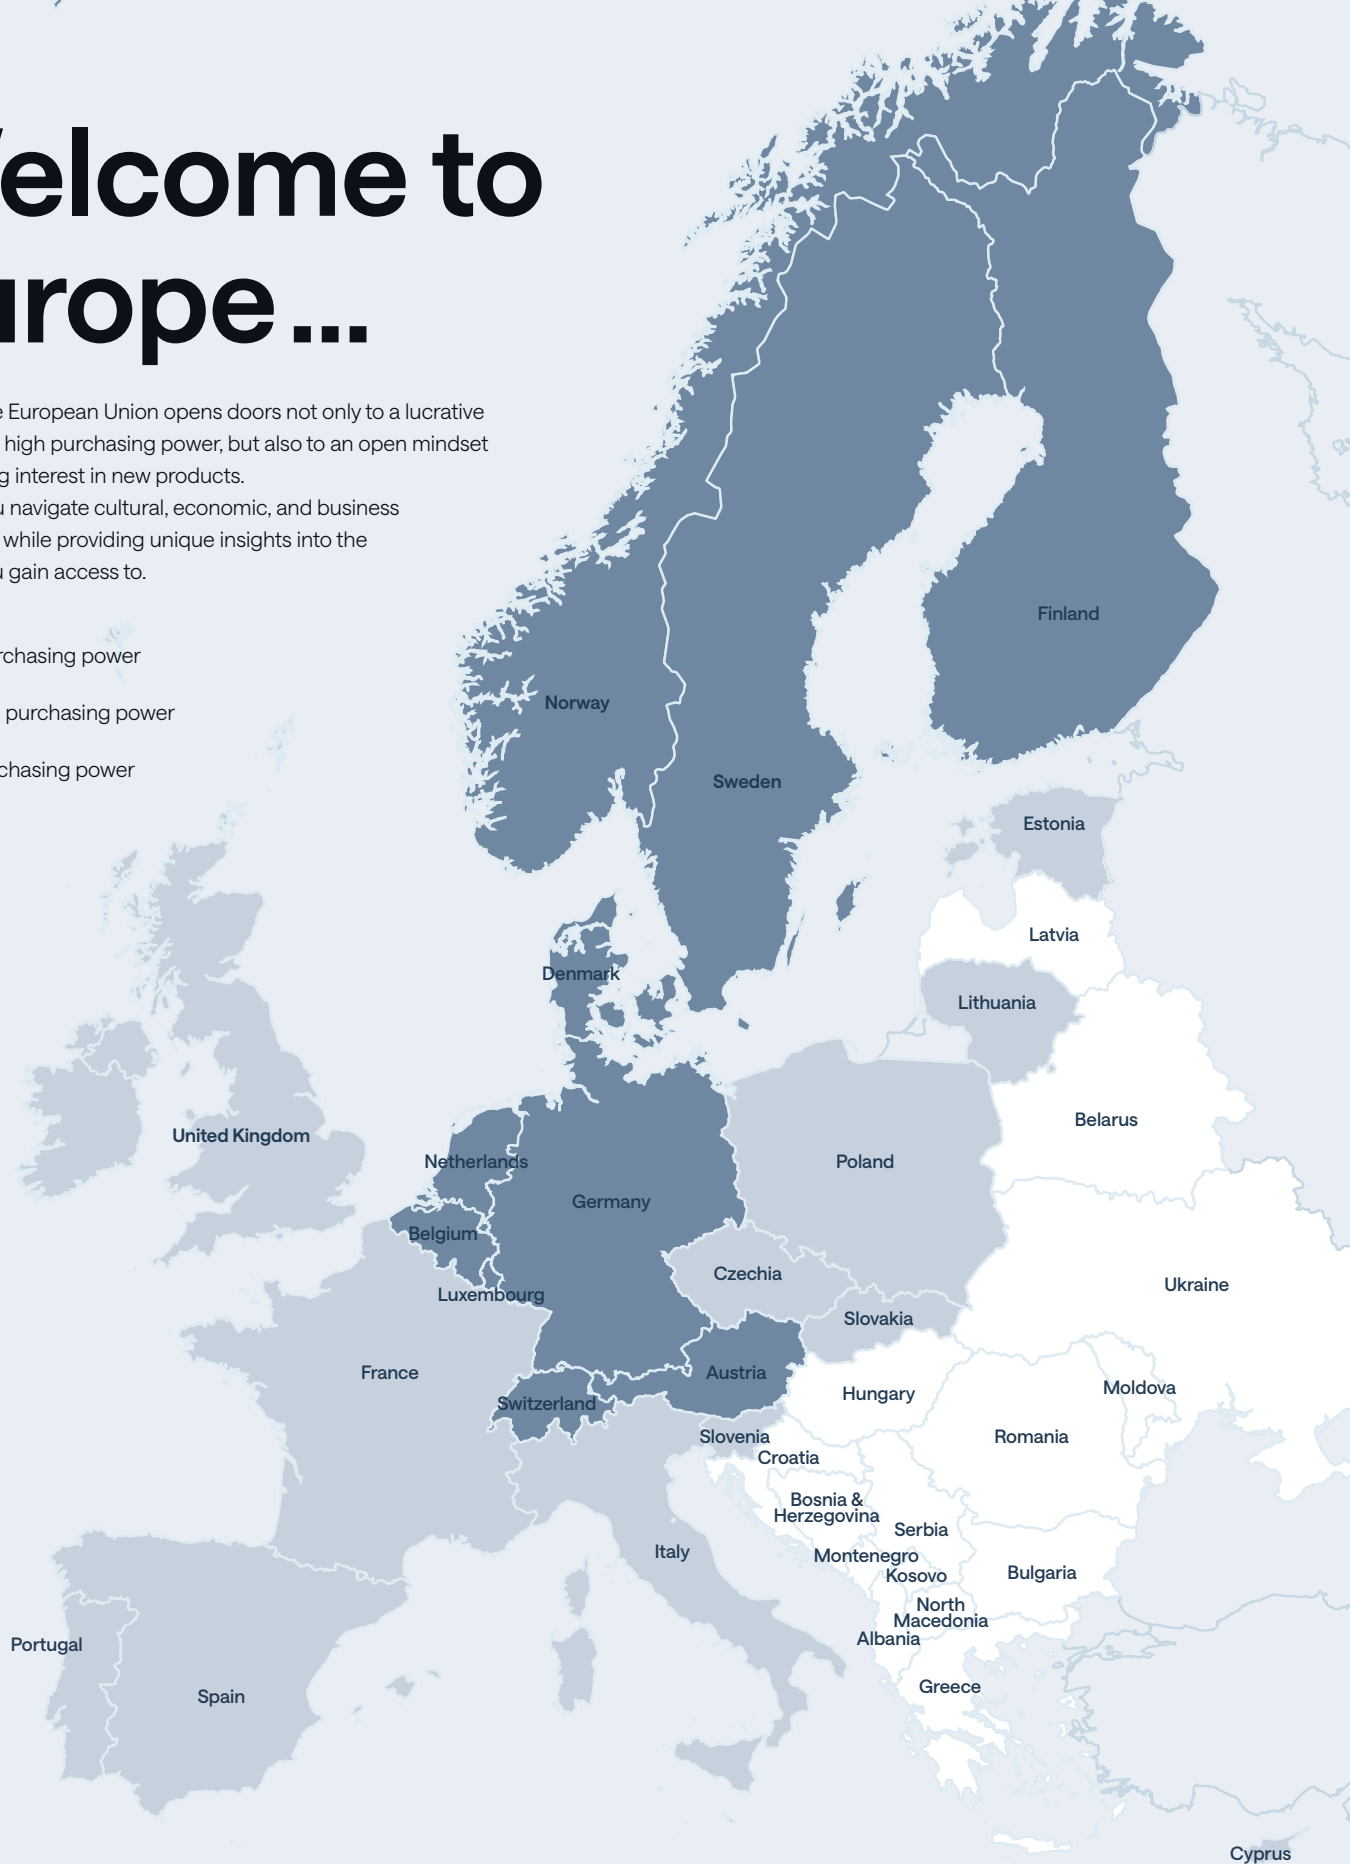

Welcome to Europe...

Entering the European Union opens doors not only to a lucrative market with high purchasing power, but also to an open mindset with a strong interest in new products.

We help you navigate cultural, economic, and business differences, while providing unique insights into the markets you gain access to.

- High purchasing power
- Medium purchasing power
- Low purchasing power

Container Management

Container Management that moves with you

Behind every shipment lies trust, timing, and ambition. Our Container Management platform gives you more than just logistics, it gives you peace of mind. From the moment a purchase order is placed in Asia to the moment the goods arrive in Europe, you track every move, stay ahead of each step, and remain firmly in control.

Book directly with world-leading carriers, track in real time, and prepare last-mile delivery long before the ship leaves port. With partners like Rhenus Logistics, your containers are unloaded, stored, and distributed seamlessly, so growth never has to wait.

Fewer obstacles. Lower costs. A supply chain as ambitious as your business.

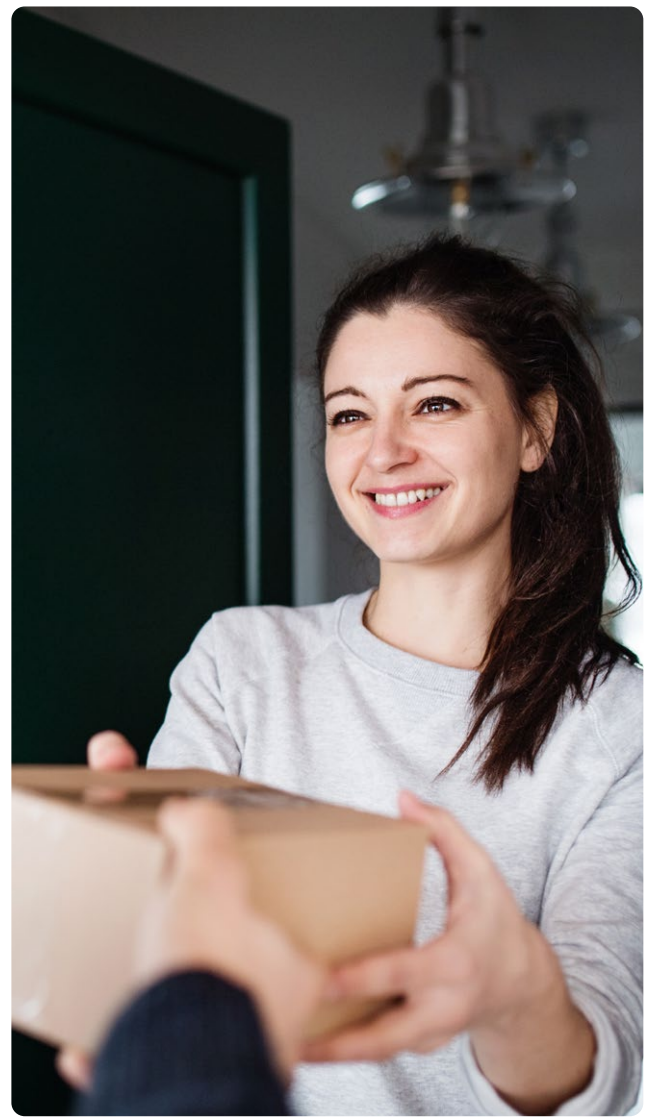

Business to Consumer

Get access to seamless B2C shipping

Beyond shipping lies connection. Every parcel delivered is a promise kept, a relationship strengthened, and a step towards lasting loyalty. With one seamless link, your brand reaches millions across Europe, reliably, transparently, and with care.

We handle customs and cross-border logistics to give your customers what they want most: trusted, hassle-free delivery. Supported by human expertise and AI efficiency, every interaction deepens the bond between brand and buyer.

This is more than just expansion. This is laying the groundwork for lasting growth, built on relationships that strengthen with every shipment.

Business to Business

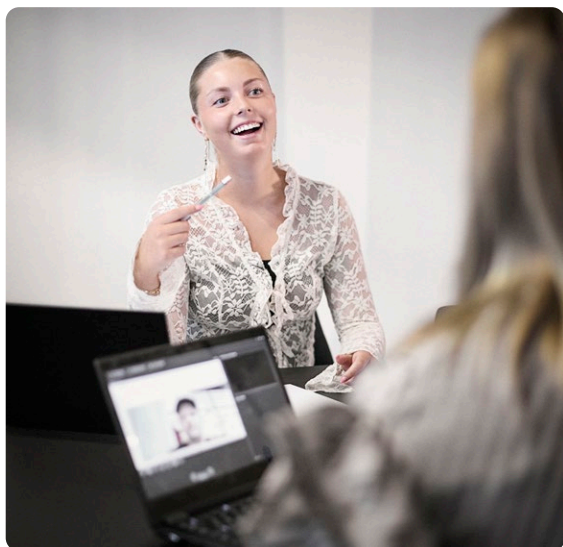

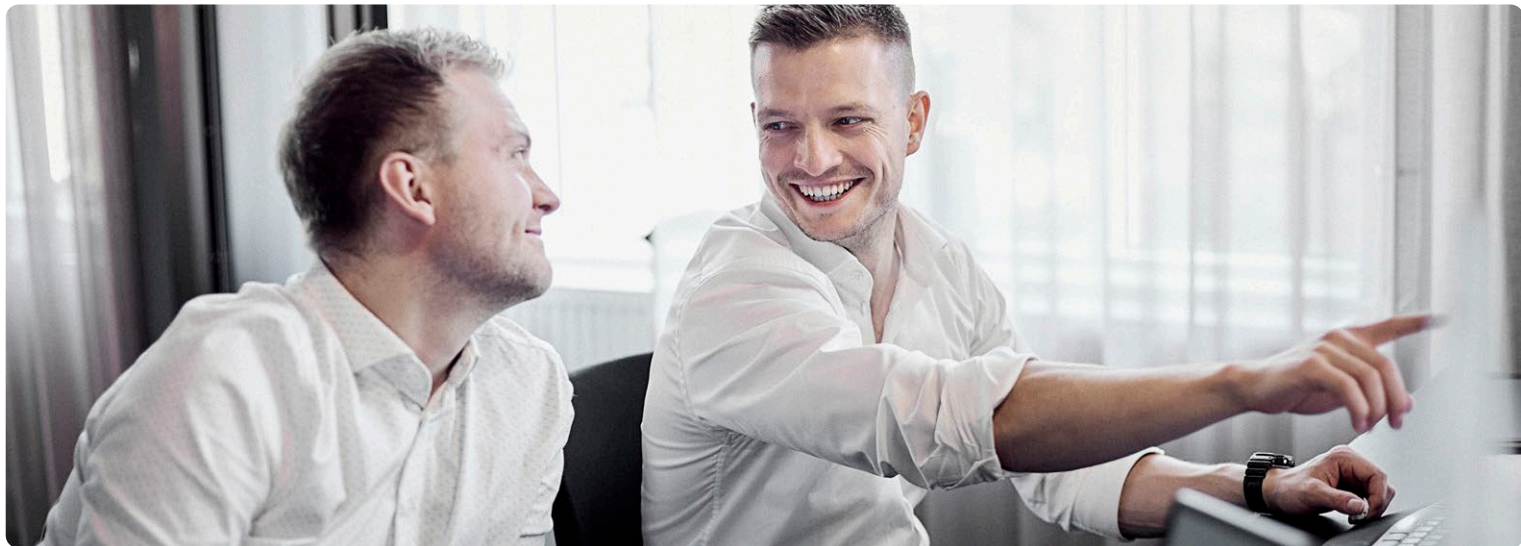

When B2B feels as effortless as B2C

B2B logistics doesn't have to be slow, complex or fragmented. With AI, managing orders becomes as smooth and intuitive as a consumer checkout.

You get:

- Orders set up in seconds
- Instant access to the best carrier rates
- Automatic compliance and documentation
- One simple, connected flow

The result? Complexity fades, efficiency soars. What once took hours now takes minutes – freeing you to focus on growth, not admin.

The joy of building the future. Together.

The future is neither digital or physical; it's where both flow seamlessly together. We don't force you into our systems; we shape our systems around yours. Through trust, growth, and real partnership, we build tomorrow together.
